DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller (5,027,330).

As per claims 1, 4, and 5, Miller teaches a system incorporating an asynchronous FIFO circuit. The system includes, with reference to figure 3, an input processor 5 (“first processor”) for writing to the FIFO and an output processor 15 (“second processor”) for reading from the FIFO. See also column 2, lines 3-9. The memory circuit includes a plurality of FIFO circuits 100, 150. The reset circuit 215 and flag circuit 210 represent the “master controller” of claim 1. FIFO status signals and the reset signal 8 represent “control commands”. The system of Mason also includes a write control circuit 205, write pointer 235, read control circuit 220, and a read pointer 245 (collectively a “control unit”, where the pointers are actually counters incremented based on signals from their respective control circuits). These pointers are loaded based on a write enable signal from the input processor and read enable signals received from the output processor. See figure 2 and column 3, lines 37-66.

As per claim 2, as set forth previously, Miller teaches a write pointer and a read pointer, which indicate the addresses to which data is written and read from.

Art Unit: 2188

As per claim 3, Miller teaches, with reference to figures 2-3, read port (elements 2 and “output data bus” 11) and write port (element 7 and “input data bus” 6).

Response to Arguments

3. Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection necessitated by Applicant's amendment of the claims.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

5. Any response to this final action should be mailed to:
